# EPSON DISCPRODUCER™ PP-100N (Network)

---

The Epson Discproducer™ PP-100N is the ideal solution if you need to burn and print CD/DVD series on a regular basis. It is networkable and specially optimised for working in groups. It can receive up to five jobs at the same time, and will publish them conveniently and reliably.

The Epson Discproducer™ PP-100N offers high reliability and superb print quality, and the following additional network features to the Epson Discproducer™ PP-100:

## More efficient workflow

- The Epson Discproducer™ PP-100N has integrated logic which can manage the jobs of several users simultaneously and process them one after the other. This cuts down on waiting time for users, and takes a significant load off your network, since the data doesn't have to be transmitted for each published media.

## More concurrent users

- Several users can be registered on the system's "Total Disc Net Administration" software.
- The system can store up to 80 jobs on its internal hard drive. The latest jobs can be retrieved in the form of a template and be reproduced at any time.

## Data protection and security

- You can disable the local CD/DVD burners on local workstations. The network publisher lets you control your valuable data and media, and the ergonomic display unit supports eight different languages. A door lock prevents the door opening during operation, ensuring safe production.

The ergonomic display unit supports eight different languages.

The door lock of the Epson Discproducer™ PP-100N avoids the interruption of operation.

## Here's how you can produce CDs/DVDs with the Epson Discproducer™ PP-100N

### 1: Deactivate local CD/DVD burners

Since your data can be sent via your network to the Epson Discproducer™ PP-100N, you can deactivate the CD/DVD burners on local workstations. That gives you, as the administrator, full control over the burning of data onto optical media.

### 2: Set up the job

Users run the “Total Disc Maker” software to create a layout, and launch their burn and print job.

### 3: Production

The blank CD/DVD discs will then be burned and printed individually to the desired number of copies and parameters defined by the user.

With Epson-recommended media, users will obtain a high-gloss printout that is both smudge-proof and water-resistant.

### 4: Allocation of the media

On completion of the burn and print job, the finished CDs and DVDs are deposited in the output compartment.

### 5: Output of the media

A status report informs the user as soon as the burn and print job has been completed. Users can remove their CDs and DVDs by either opening the safety door or by using the output drawer.

The intuitive “Total Disc Network Administrator” software lets you manage users and their jobs.

## TECHNICAL SPECIFICATIONS

<b>LCD:</b>	Number of characters: 16 characters × 2 lines. Contrast adjustment in 8 levels Language: English, Japanese, French, German, Spanish, Italian, Dutch, Portuguese
<b>LEDs:</b>	Power (Green), Busy (Green), Error (Orange)
<b>Buttons:</b>	Menu, Eject, Cancel, Enter, Arrow keys (Up, Down, Right, Left)
